Solve Me!

Show your work and include
the "therefore" statement

9 boxes contained a total of 720 candles, evenly split throughout the boxes. 4 boxes were shipped to one store and 5 more - to another. How many candles did each store receive?

There are 276 birch trees in the park, which is 48 less than maple trees. What is the total number of trees in the park?

Fill in the missing digits and check

$$
\begin{array}{r}
-\ 54\square \\
1\square 3 \\
\hline
\square 79
\end{array}
$$

Create a problem, such that its solution could be found by setting up the expression: $30 - (30 + 24) \div 4$
