Solve Me!

Show your work and include the "therefore" statement

Express $\frac{7}{8}$ as a product of three different fractions.

There are more than 110 but less than 130 pears in the box. Given that the amount of pears in the box is divisible by 12 and 5, find the exact total number of pears in the box.

If a number is increased by two thirds of itself and then by 1 more, the answer is 11. What is the number?

Solve the equation: $7(x + 2) = -14$

Answers
1. answers may vary
2. 120
3. 6
4. -4
