

# SWEET HALLOWEEN

Can you convert percent into pieces of candy?

Name:

Date:

Alicia went trick or treating and got so many candy pieces - 340! Alicia has 2 younger brothers and a sister, who did not go out. So she decided to share with them. She gave 25% of her candy to her sister and split 40% equally among her two brothers. How many pieces did each one of the siblings (including Alicia) get?
